Portfolio: paulnguyen.portfolio

Experienced in consulting and delivering technology solutions for enterprise clients, with a focus on understanding business needs and driving successful implementation. Within the next 3 years, aims to advance to a ***Senior AI Solution Consultant*** *role*. Within 5 years, aspires to become an ***AI Solution Architect***, leading the design and delivery of end-to-end technology solutions.

EDUCATION

UNIVERSITY OF INFORMATION TECHNOLOGY, VNU HCM

Master of Science in Computer Science (2025 - 2027)

Bachelor of Artificial Intelligence (2022 - 2025)

- **GPA**: 3.3/4.0 (Very Good)

CERTIFICATIONS & ACHIEVEMENTS

- Top Entrance Scorer - Master of Computer Science, UIT.
- Microsoft GCPS Certified; contributed to partner tier advancement.
- Top 1 – FTI AI Process Automation Competition.
- Research publications: SoICT 2024 & NSS 2025.

WORK EXPERIENCE

FPT TELECOM INTERNATIONAL (FTI)

AI Solution Consultant

HCMC | July 2025 – Oct 2026

- Consulted on AI strategy, solution architecture, and digital transformation for **20+ enterprise clients** across banking, finance, manufacturing, retail, and other industries.
- Contributed to 9 **AI & Cloud deals/projects,** delivering technical presentations, solution proposals, Proof of Concepts (PoCs), and customer technical training.
- Designed tailored AI solutions for enterprise clients, including **Shoefabrik, Motives, Simpson Strong-Tie**, and **Ton Dong A**, focusing on supply chain optimization, document processing, data analytics, and workflow automation.
- Collaborated with **Microsoft Vietnam** to organize and co-host Copilot Workshops and Executive Briefings for enterprise customers.
- Spearheaded AI adoption frameworks and enablement programs, supporting **600+ users at Coteccons** and **6,000+ users at VIB**.
- Earned Copilot Jumpstart and Frontier Engineer credentials, strengthening FTI's AI solution delivery capabilities.

AI Engineer Intern

HCMC | Jan 2025 – June 2025

- Developed an AI-powered ticket-processing automation product, **reducing manual tool operations by 80%** and improving workflow efficiency.
- Designed and deployed AI agents to automate information-processing workflows based on business requirements.
- Integrated third-party APIs and managed **GitLab pipelines** to support system integration and collaborative development.
- Conducted technical research, testing, and evaluation of AI solutions to assess feasibility, performance, and suitability for enterprise deployment.
- Supported solution development and troubleshooting, ensuring AI applications met technical requirements and business needs.

FEATURED PROJECT

NEWS VERIFICATION SUPPORT SYSTEM (FraudTrace – NSS 2025 Publication)

Feb 2025 – Jun 2025

- Designed a multi-agent AI system that helps users verify information against multiple sources.
- Built specialized agents for distinct processing tasks and coordinated them into one verification workflow.
- Fine-tuned LLMs with Hugging Face and Unsloth to improve accuracy and reliability.
- Developed the web interface in Next.js and containerized the full system with Docker for deployment.

SKILLS

Technical Skills: Microsoft Power Platform • Copilot Studio • Python • JavaScript • FastAPI • Next.js • REST API Integration • Workflow Automation • n8n • Dify • AI Agents • Multi-Agent Systems • LLMs • RAG • NLP • Computer Vision • LangChain • CrewAI • Hugging Face • Unsloth
Development Tools: Git • GitLab • Docker • Linux • GitLab Pipelines
Soft Skills: Problem-solving • Critical Thinking • Communication • Teamwork & Collaboration • Adaptability
Languages: Vietnamese (Native) • English (Intermediate)
